

## **ROYAL COLLEGE OF GENERAL PRACTITIONERS**

# **REVIEW OF COLLEAGUE AND PATIENT SURVEY INSTRUMENTS**

The RCGP has reviewed currently available tools for conducting colleague and patient surveys in general practice in the UK to assess their suitability for use by GPs for revalidation. The RCGP has considered:

- The breadth of coverage by each tool (mapped to the GMC Framework)
- The validation undertaken for each tool

The companies themselves, value for money or the method used for analysis and feedback were not considered in the assessment.

### **Colleague Surveys**

The following Colleague Surveys are regarded as 'fit for purpose' for revalidation:

- [Sheffield Peer Review Assessment Tool Version 2 \(GP-SPRAT\)](#)
- [CFEP Colleague Feedback Evaluation Tool Version 2 \(CFET\)](#)
- [General Medical Council Colleague Questionnaire](#)
- [EDGECUMBE 360° Colleague Feedback](#)
- [2Q MSF](#)

### **Patient Surveys**

The following Patient Surveys are regarded as 'fit for purpose' for revalidation:

- [General Medical Council Patient Questionnaire](#)
- [CFEP Improving Practice Questionnaire \(IPQ\)](#)
- [EDGECUMBE 360° Version 2](#)
- [CFEP Doctors' Interpersonal Skills Questionnaire \(DISQ\)](#)
- [Consultation Satisfaction Questionnaire \(CSQ\)](#)
- [CARE Measure questionnaire](#)
