

RMS and MAG2 validation (when using MAG MAF)

From: NHS YORKSHIRE AND HUMBER COMMISSIONING
SUPPORT UNIT)

Subject: RE: RMS toolkit

The MAG2 validation is just related to the 'No' on the QIA, not the MSF, therefore you need to select 'Disagree' on MAG2. The appraisal output summary form is yearly, not 5 yearly. Just to confirm MAG2 validation does also include Significant Events, Complaints and Compliments and Scope of Work if 'No' is selected.

The 'annual status' will therefore be red, however if you take a look at the revalidation summary it should become clearer when looking at the 'overall score' depending on how many appraisal output summaries have been completed.

Kind regards

Subject: RE: RMS toolkit

Hi S

That does seem a bit daft.

I have 2 Nos, 1 related to a QIP, the other 2 having completed an MSF. (I thought both could be 5 yearly)

If I agree with MAG2, the annual status becomes green, but I can't save, if I don't it is red and I have not tried saving as I am told this is an irreversible action.

I am agreeing with the statement
Appropriate supporting information has been presented in accordance with GMP Framework for appraisal and Revalidation and this reflects the nature and scope of the doctor's work.

Are we saying you have to disagree with this statement if there is No QIP, or No MSF. I am not sure which.

If the annual status is red, what does this mean?

Many thanks for your help

L
